

# Final Year Project

Login → has no distinction (doctor, patient or admin); separate login based on the user id

## Patient Side

- Home → shows few specialisations available + view all; shows all specialisations in view all
- Home > Specialisation > Doctor list > Book Appo > Enter date and time (for overlap will show an error message) > fill personal details (autofill option to be added)
- upcoming appo → lists all upcoming appointments; has option to cancel an appo
- History → shows all past appos
- view profile → shows patient's personal details
- update profile → can update profile; the profile picture for them is not mandatory
- search → shows suggestions based on keywords typed (specialisations + doctor names)
- Patients can rate a doctor after an appo ends; cannot do from history - have to search the doctor

## Doctor Side

- Home → Today's Appos; will be present on the table until EOD even if marked as done
- Pending appo → appos that are over and not marked as done will be in the pending section for 48hrs to be marked.
- Update profile → can add/update academic + professional + personal details; profile picture is mandatory - can update that as well
- History → all past finished appos
- sign up → takes doctor's reg no as a unique key to avoid double entries and to ban a doctor as well

## Admin Side

- Update specialisation for docs
- Add new specialisations
- can ban a doctor from the doctor's profile
